

## Table A – Results of Internal Review Committee

Date of Review/Recommendation: September 20, 2007

Water Body Under Evaluation:

Water Body ID #: 3703 (Also see North River, WBID 83)  
Name: North River (Class C)  
Length of Segment: 8.7 miles  
County(ies): Knox

Use Attainability Analysis (UAA) Study:

UAA ID #: 0017  
Submitter: MEC Water Resources, Inc.  
Date(s) Conducted: May 18, 2007  
Date Received: June 4, 2007  
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in May 2007 and no WBCR was observed. No interviews were conducted during the survey. ATV tracks were observed at Site 3.

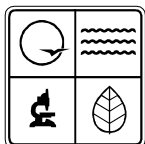

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: This stream was divided into two sub-segments in the Nov. 2005 Water Quality Standards (WQS). The lower sub-segment was assigned WBCR, but the upper was not. Five of the nine sites evaluated in this UAA (#s 5 – 9) were on the lower sub-segment, WBID 83 (see separate Internal Review Committee Recommendation). The remaining four sites (#s 1 – 4) were on the upper sub-segment, WBID 3703.

The stream did not meet the depth criteria at any of the four sites evaluated on WBID 3703. As a result, data in this UAA supports the 2005 Water Quality Standards where the WBCR use was not assigned to WBID 3703. However, due to evidence of secondary contact, Secondary Contact Recreation is recommended to be assigned.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive

Committee Members: Jill LeRoy, Donna Menown, Anne Peery
